

## Accident Investigation

### Course Objectives:

This course is designed for those who carry out investigations for managerial and legal requirements and are seeking to maximise the benefits of remedial action.

### Who Should Attend?

Line managers and supervisors.

**Duration:** 1 day

### Course Content:

At the end of the course delegates will be able to:

- Investigate events which led, or may have led, to injury
- Have an appreciation of the legal reporting system
- Understand the monitoring and recording systems required
- Be able to prepare formal reports
- Be able to make logical proposals to prevent further occurrences

Delegates will also have an understanding of:

- The definition of an accident and the main causes of them
- The need for a structured investigation procedure
- The principals of accident investigation using HS(G)245
- The reporting of injuries, diseases and dangerous occurrences (RIDDOR)
- Near miss investigation
- Practical experience of investigation through scenario accidents

At the end of the course delegates will receive a certificate of attendance.
