

## Site Supervisors Safety Training Scheme (SSSTS)

### Course Objectives:

This two day course provides supervisors with an understanding of health, safety, welfare and environmental issues, as well as their legal responsibilities relevant to their work activities.

### Who Should Attend?

Anyone who works in Construction/Civil Engineering at supervisory level, or is about to acquire supervisory responsibilities.

Delegates will be required to complete a multiple-choice question paper, as well as being interactive during the course.

**Duration:** 2 days

### Course Content:

The aim of this course is to ensure that all those given supervisory responsibilities understand:

- Why they are carrying out their identified duties
- What is expected of them
- That they contribute to the safety of the workplace.

At the end of the course delegates will be able to:

- Understand the problems of the industry
- Have an understanding of how health and safety law is structured and how it applies to supervisors
- Identify how their role fits in with the management structure in controlling site safety
- Carry out risk assessments and understand the need for method statements
- Carry out effective site inductions, toolbox talks and method statement briefings
- Monitor site activities effectively
- Understand the importance of timely intervention when bad practice is identified.
