

## Inspection of Lifting Equipment

### Course Objectives:

This course is designed to make delegates aware of the safe practices and correct procedures required when inspecting lifting tackle and accessories, including recording and keeping of records as required.

### Who Should Attend?

Persons responsible for inspection of lifting equipment and record keeping.

### Course Content:

Topics covered on this course include:

- The Health and Safety at Work Act
- The Provision of Use of Work Equipment Regulations (PUWER)
- The Lifting Operations and Lifting Equipment Regulations (LOLER)
- Inspection and thorough examination of lifting equipment
- Hydraulic lifting equipment (if required)
- Duties of the responsible person, to include record keeping

On successful completion of the course delegates will receive a certificate of attendance.

**Duration:** 1 day
